

XRP Trust Vault+

Freedom with
backup.

Human-secured custody
on XRPL.

• Overview

- Self-custody is powerful – but risky.
- XRP Trust Vault+ adds a human layer of protection without losing control.

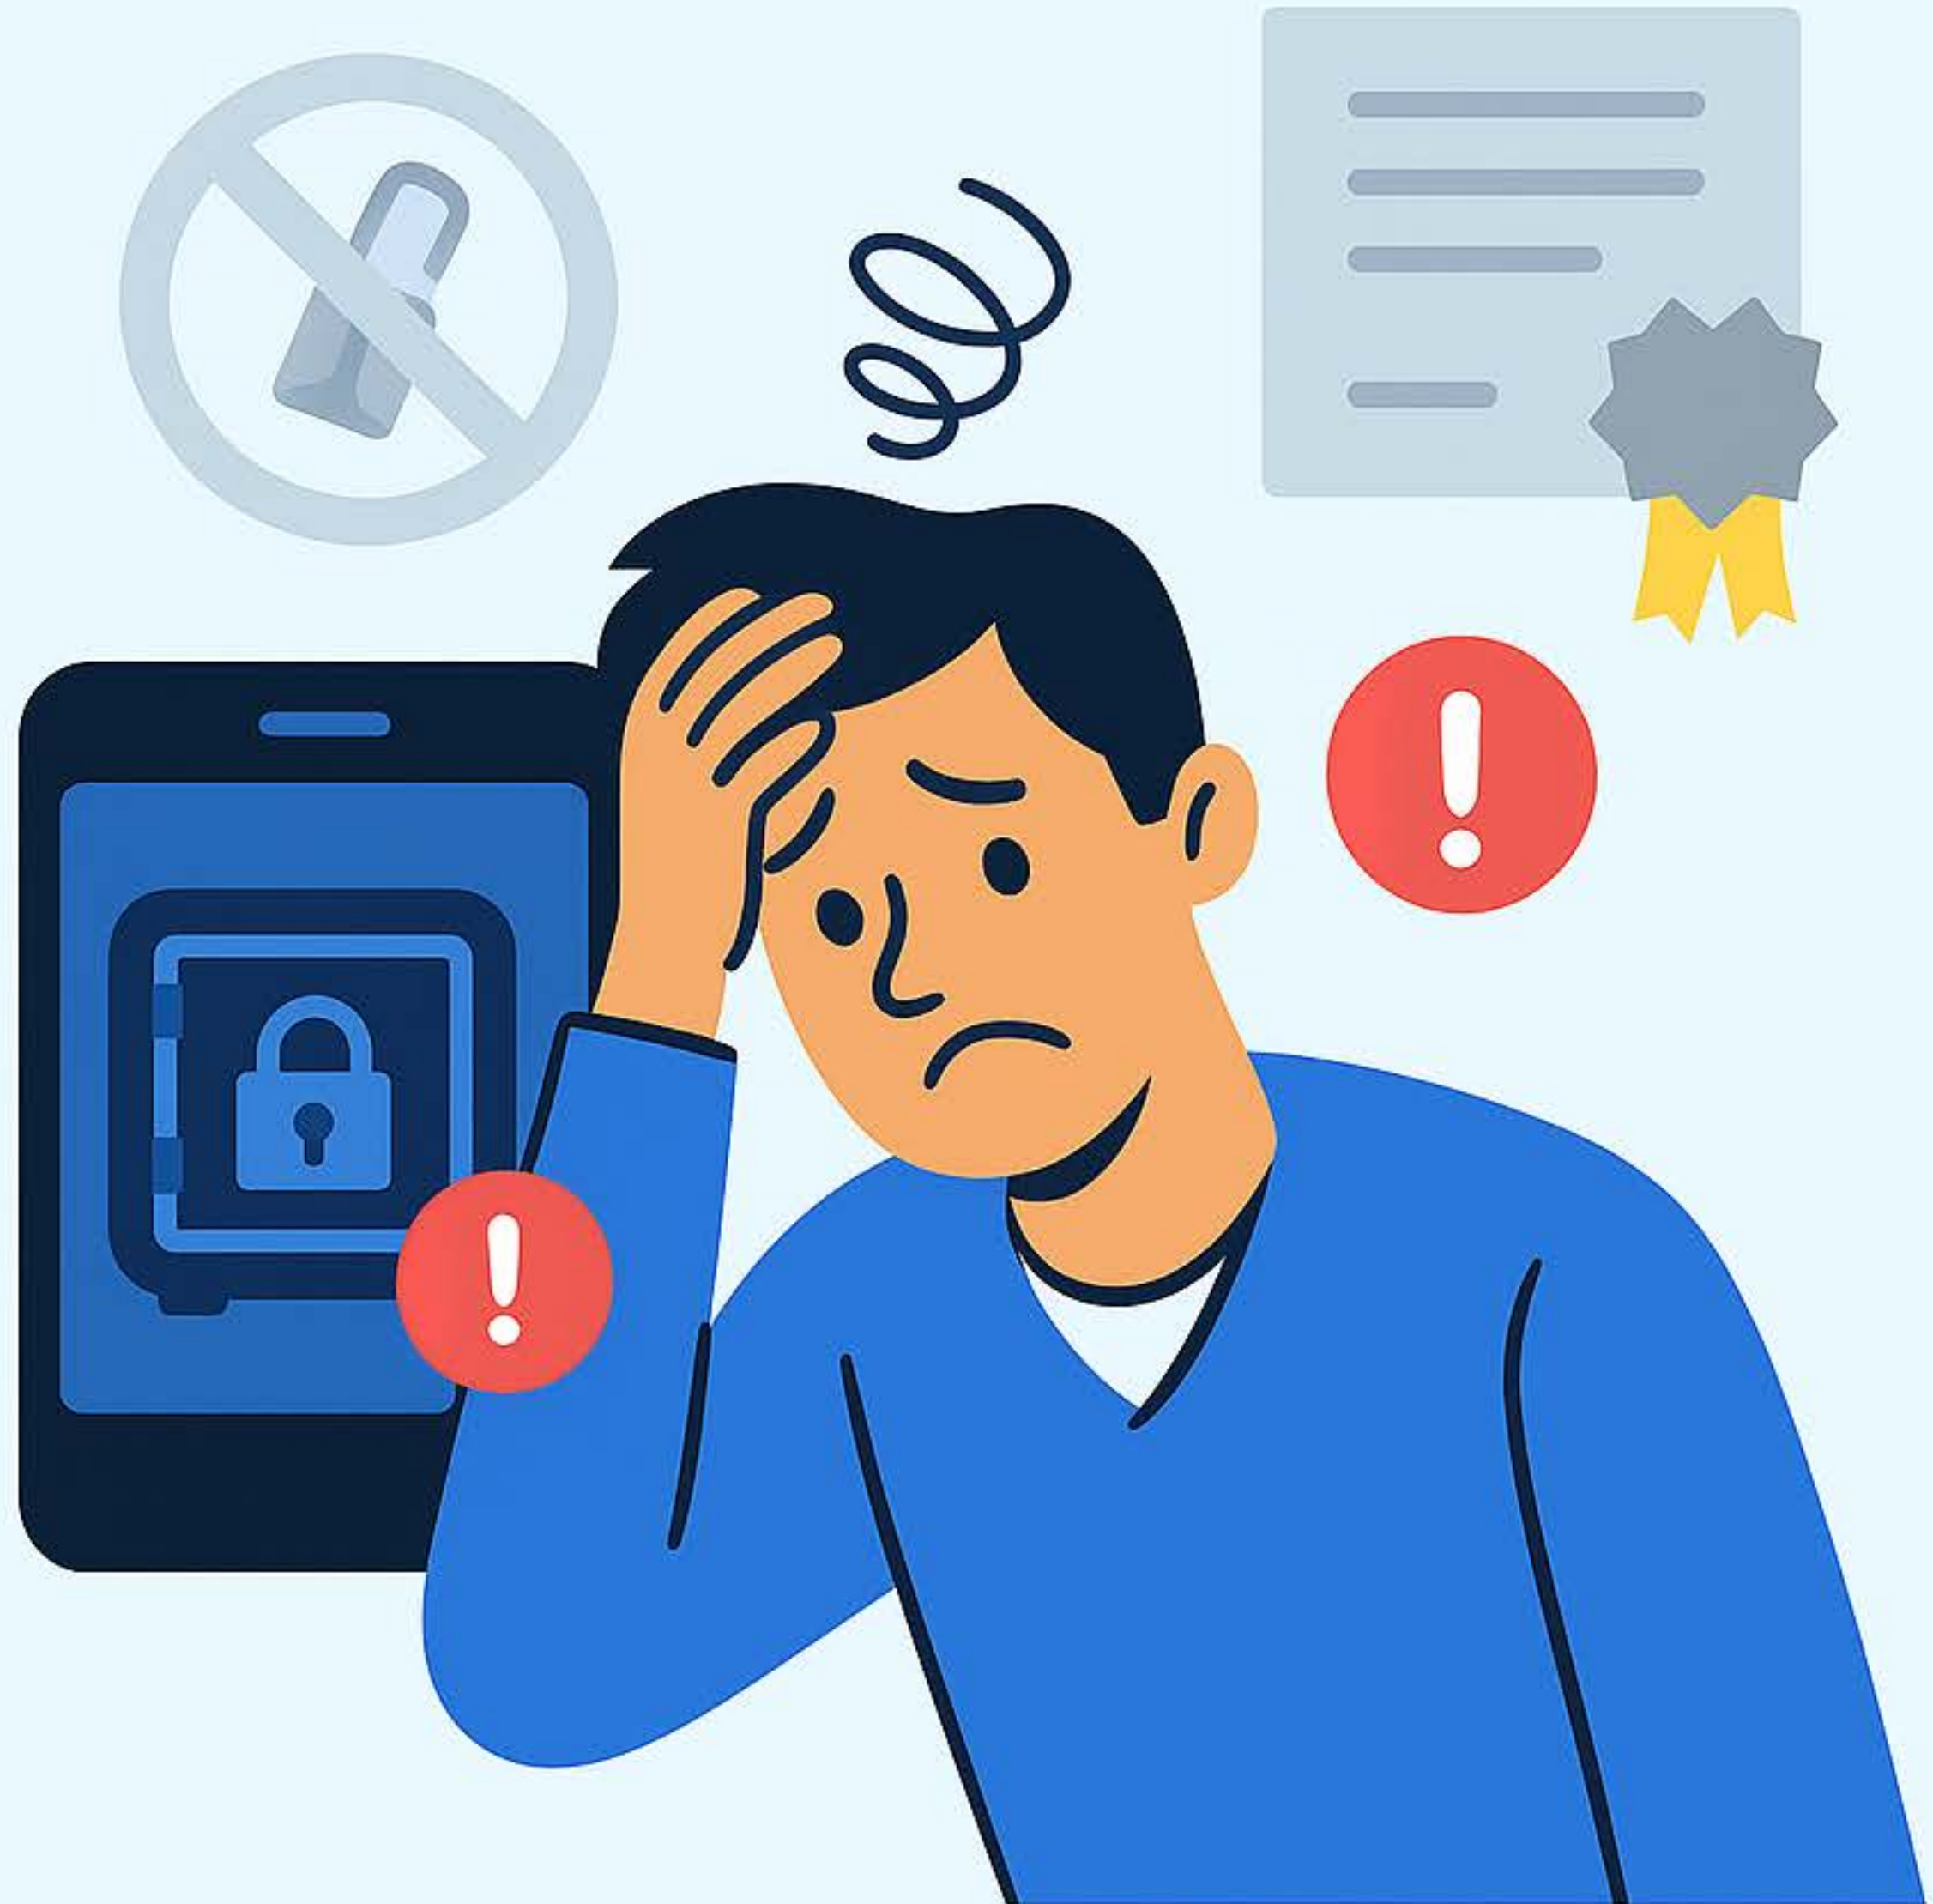

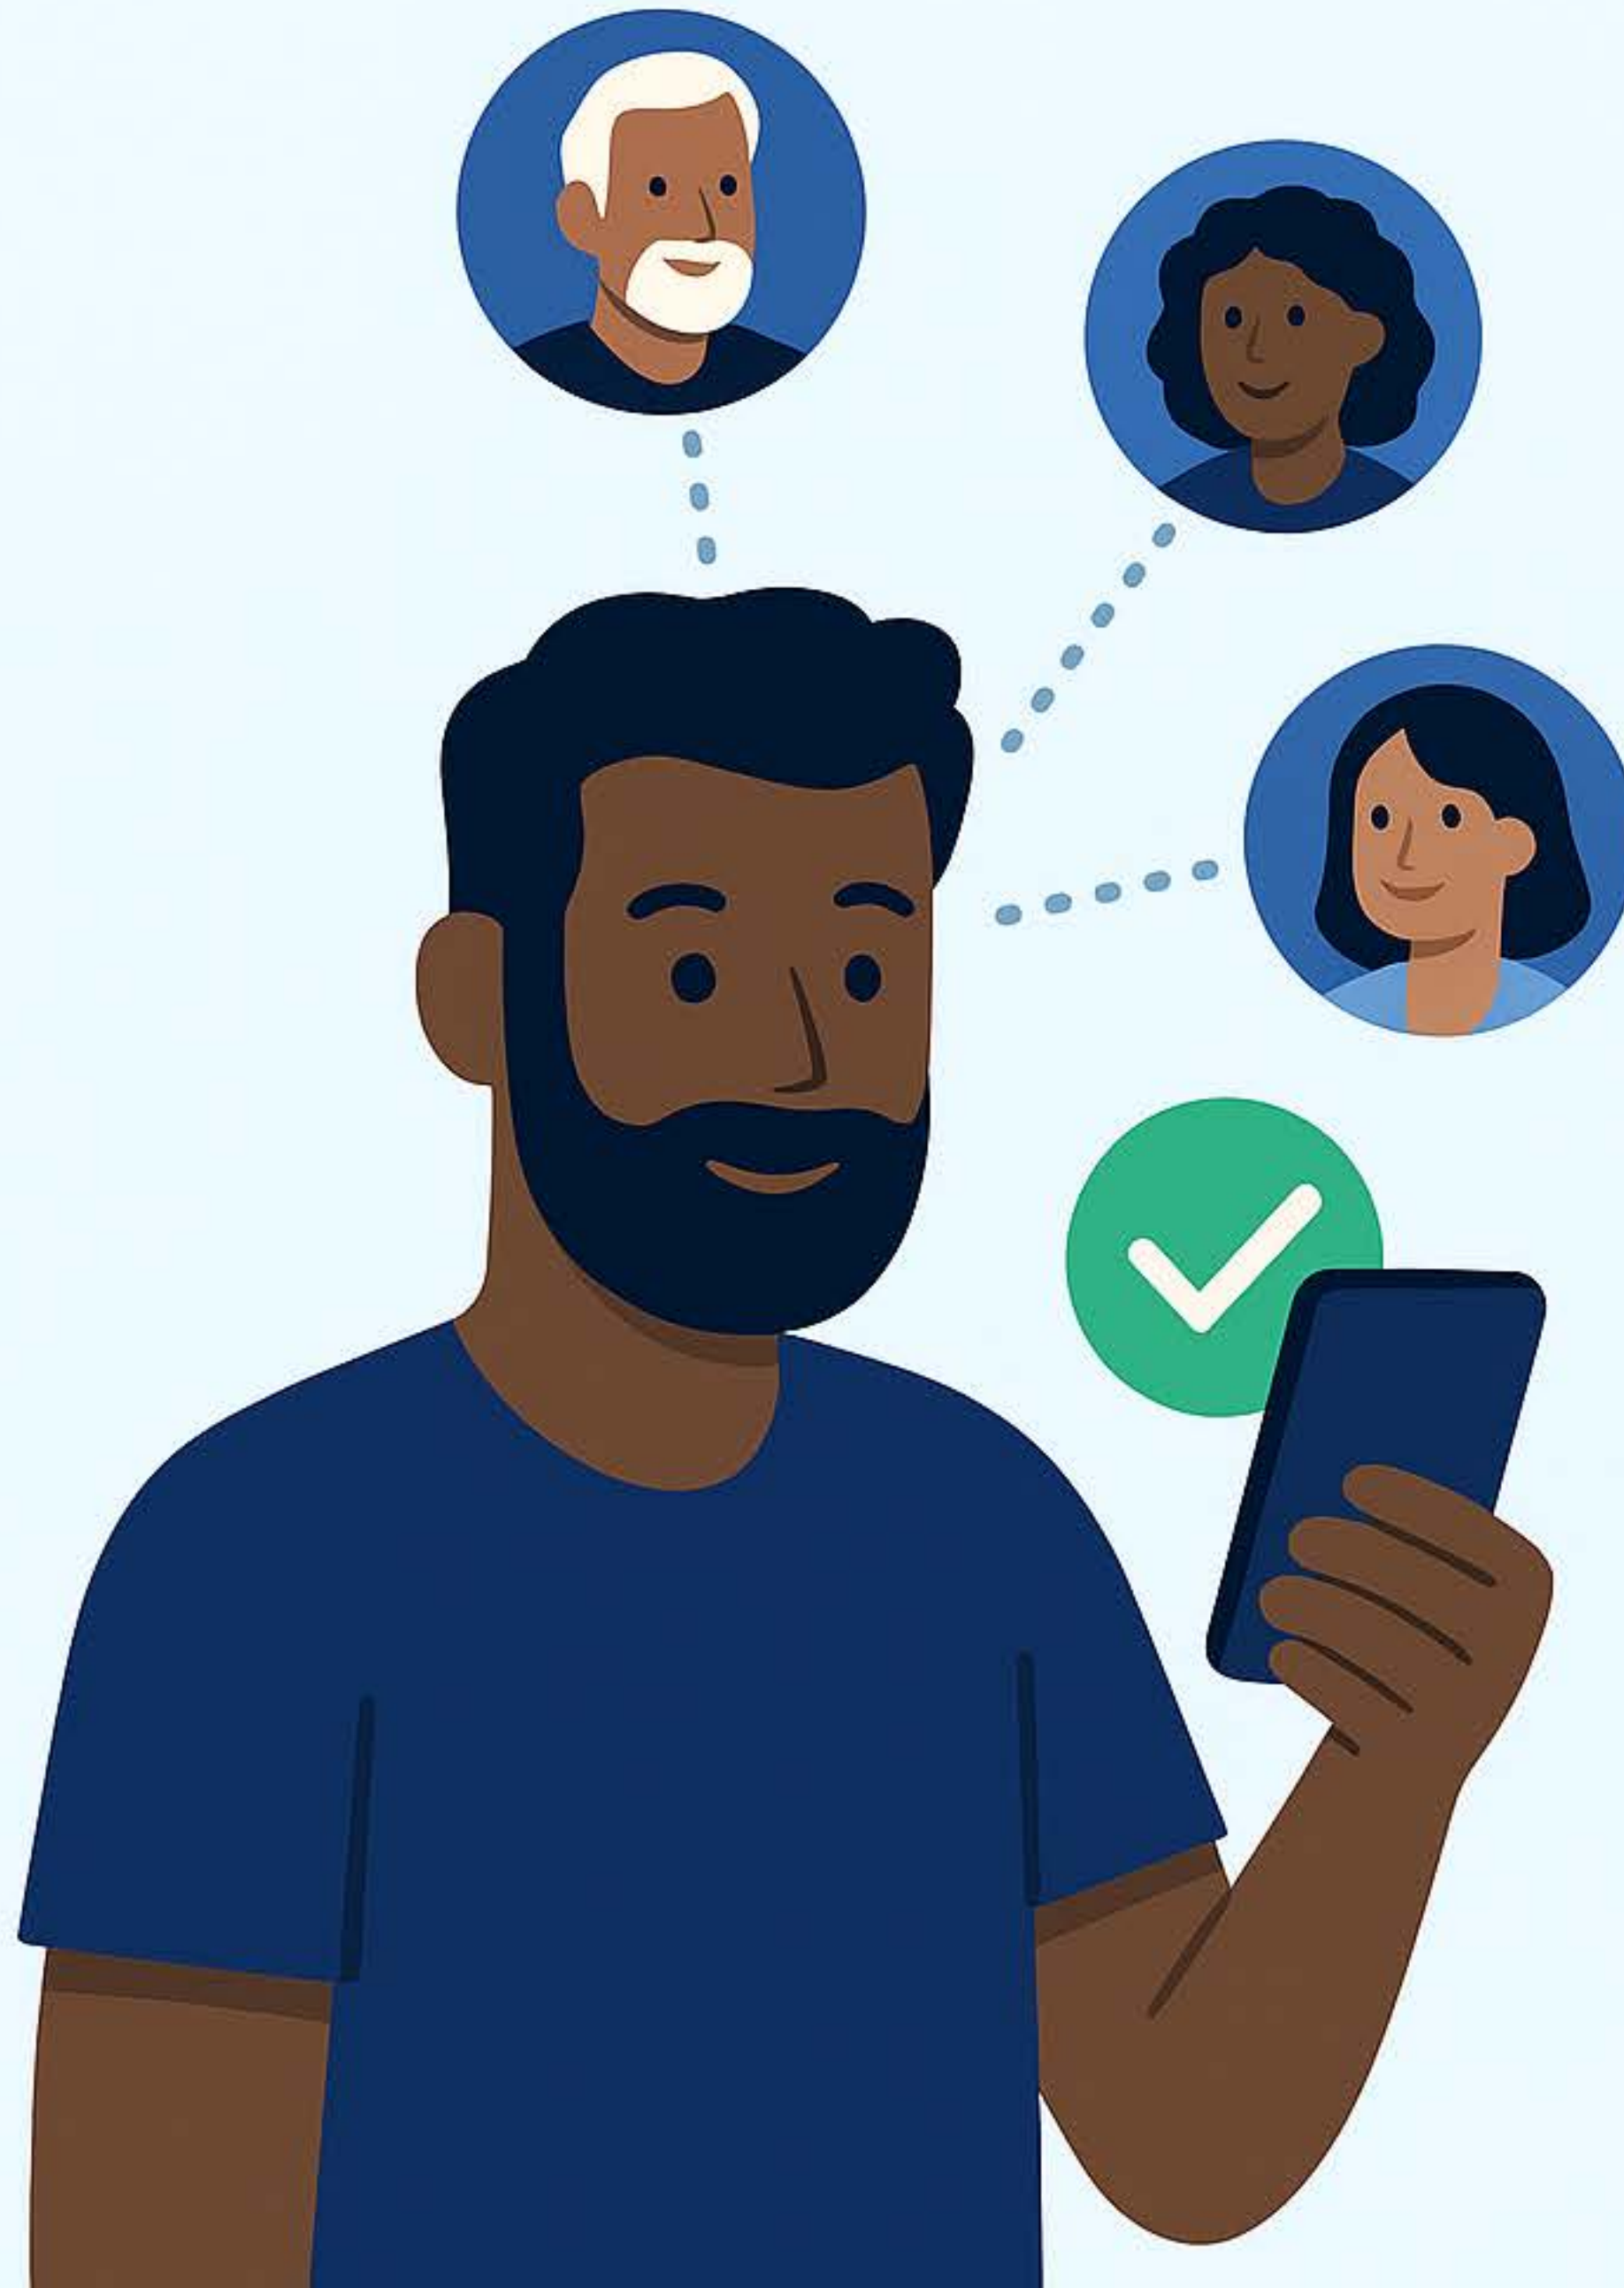

XRP Trust Vault+

Human-secured
custody on XRPL

Problem

- Fear of losing access or making mistakes
- No built-in recovery or inheritance
- Users struggle to manage crypto responsibly

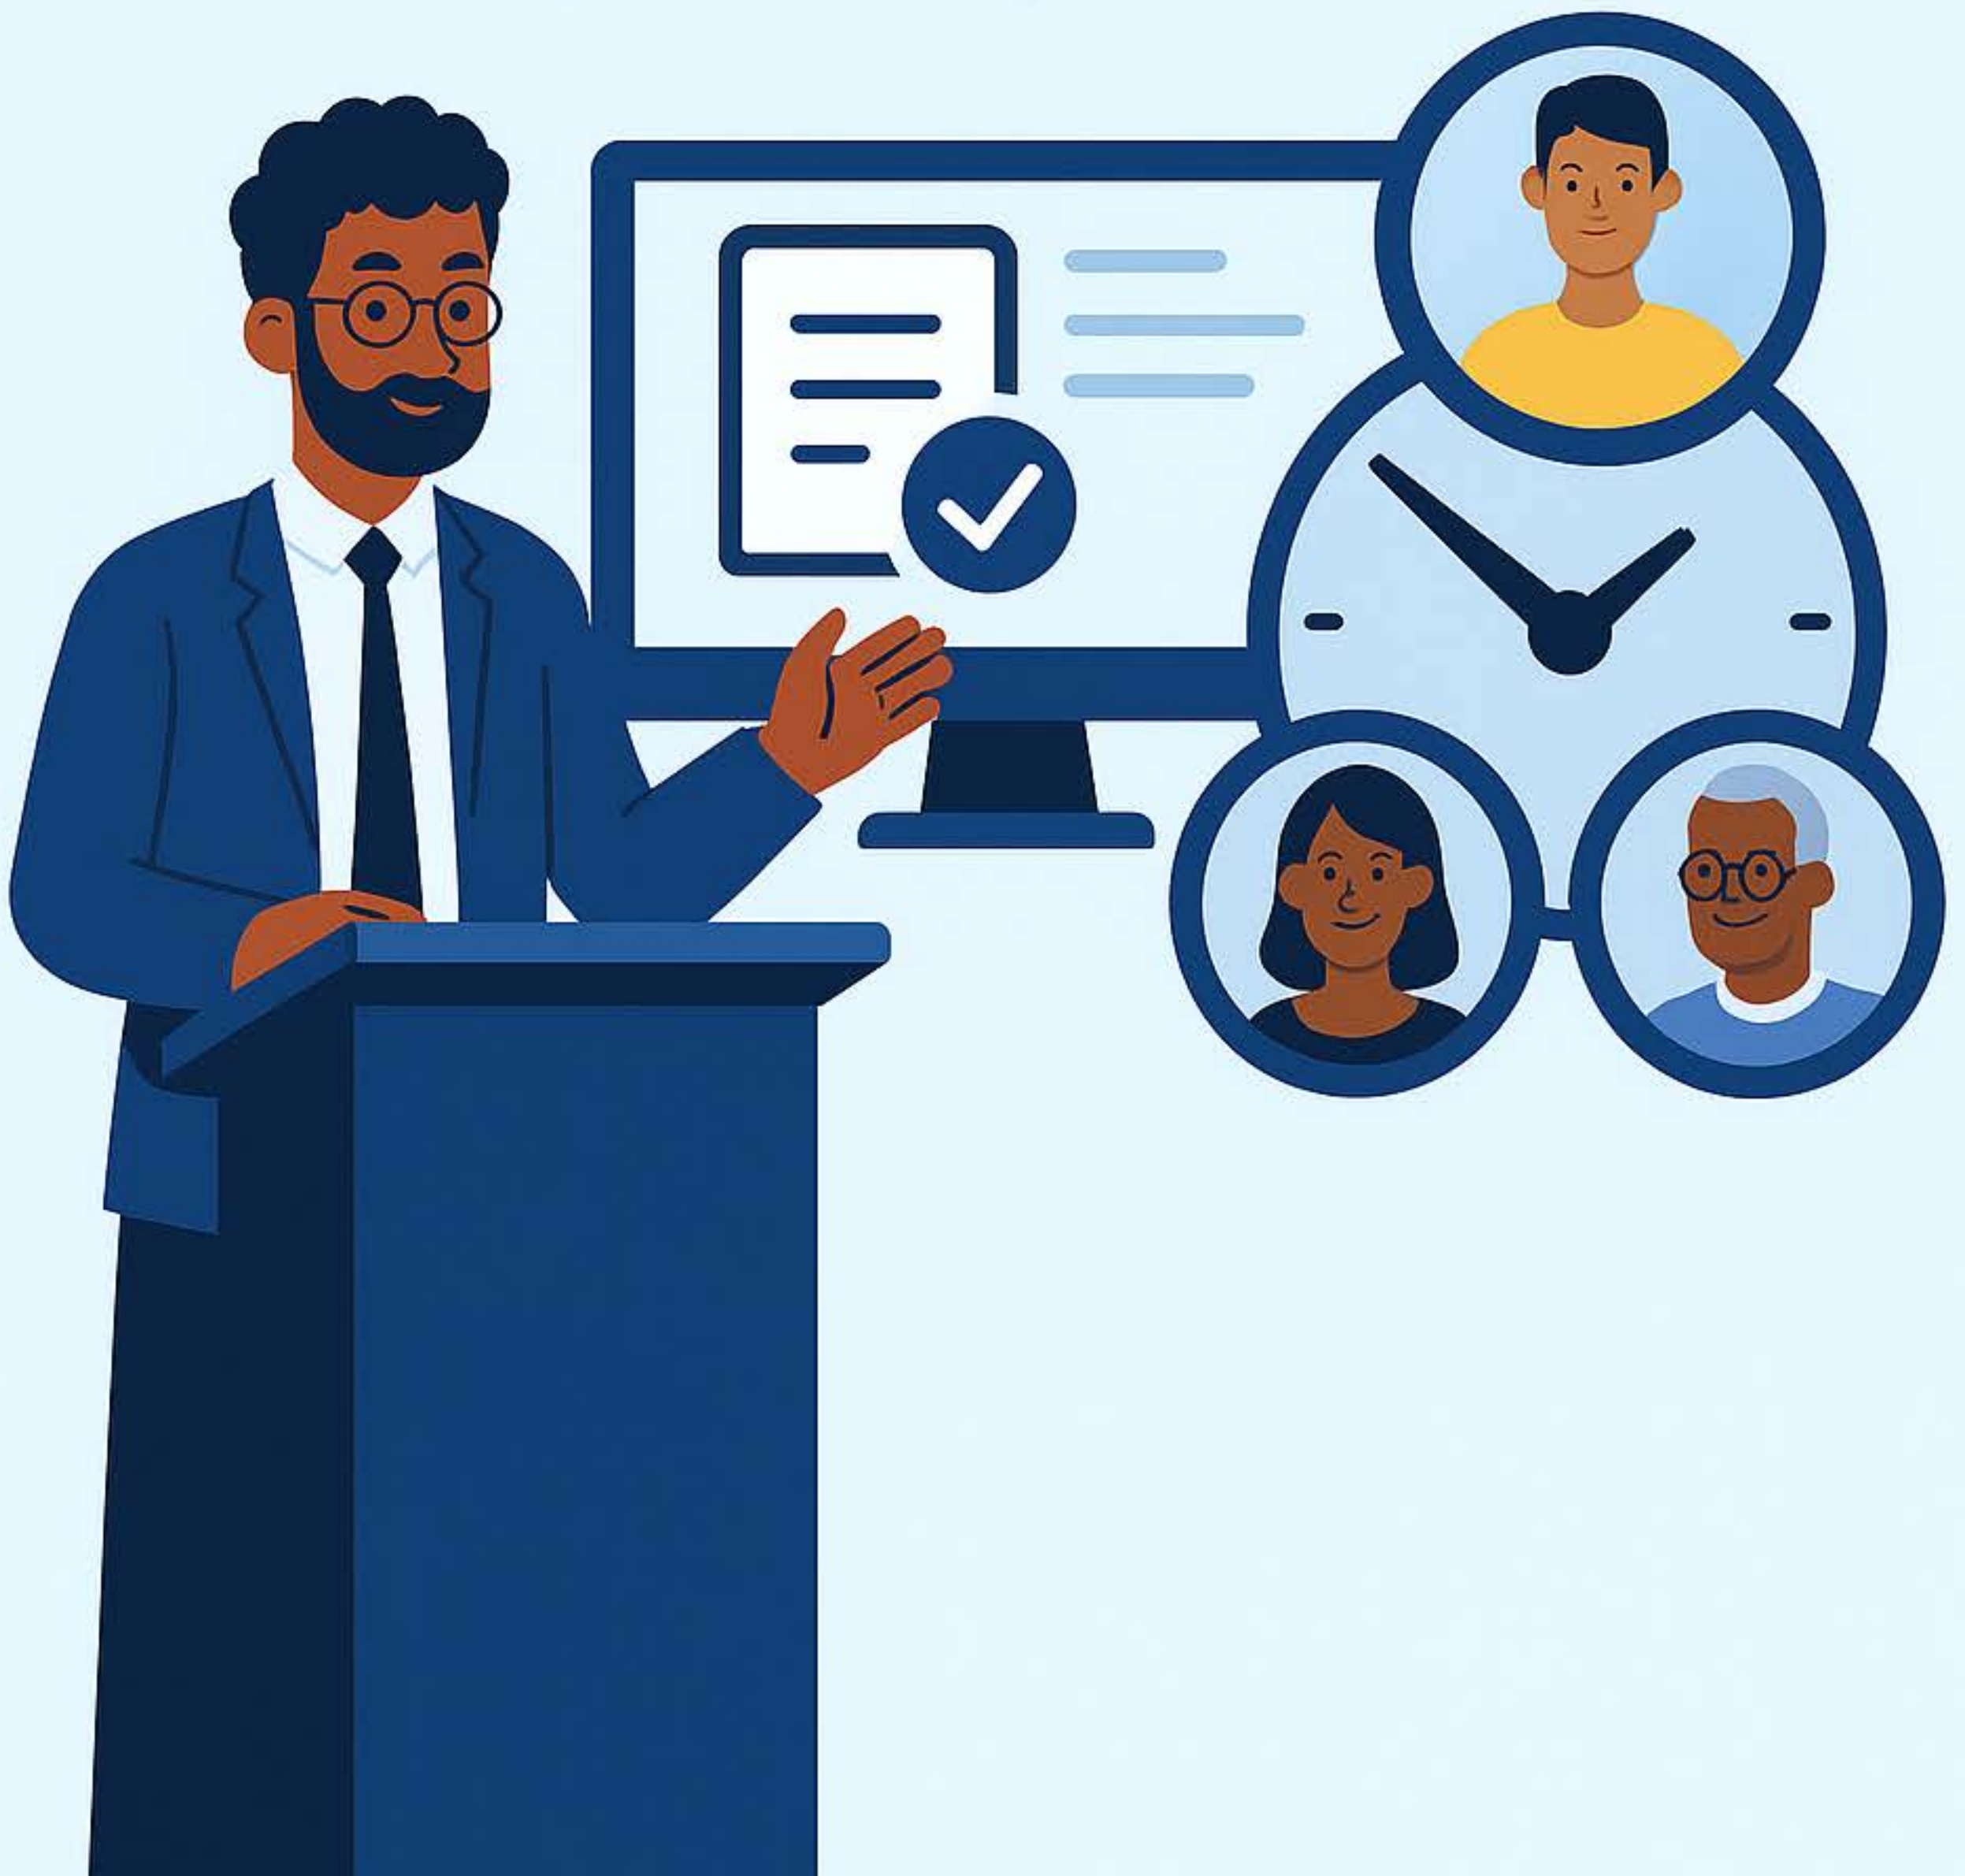

Social Recovery

- Define 3-5 trusted people
- Majority must approve to recover access
- Fully decentralized & private

Digital Inheritance

- Pre-define heirs and triggers
- Automatic transfer upon death/inactivity
- No lawyers or legal hassle

Key Benefits

- Peace of mind with full control
- Human fallback for crypto users
- Ready for legal, family and business needs

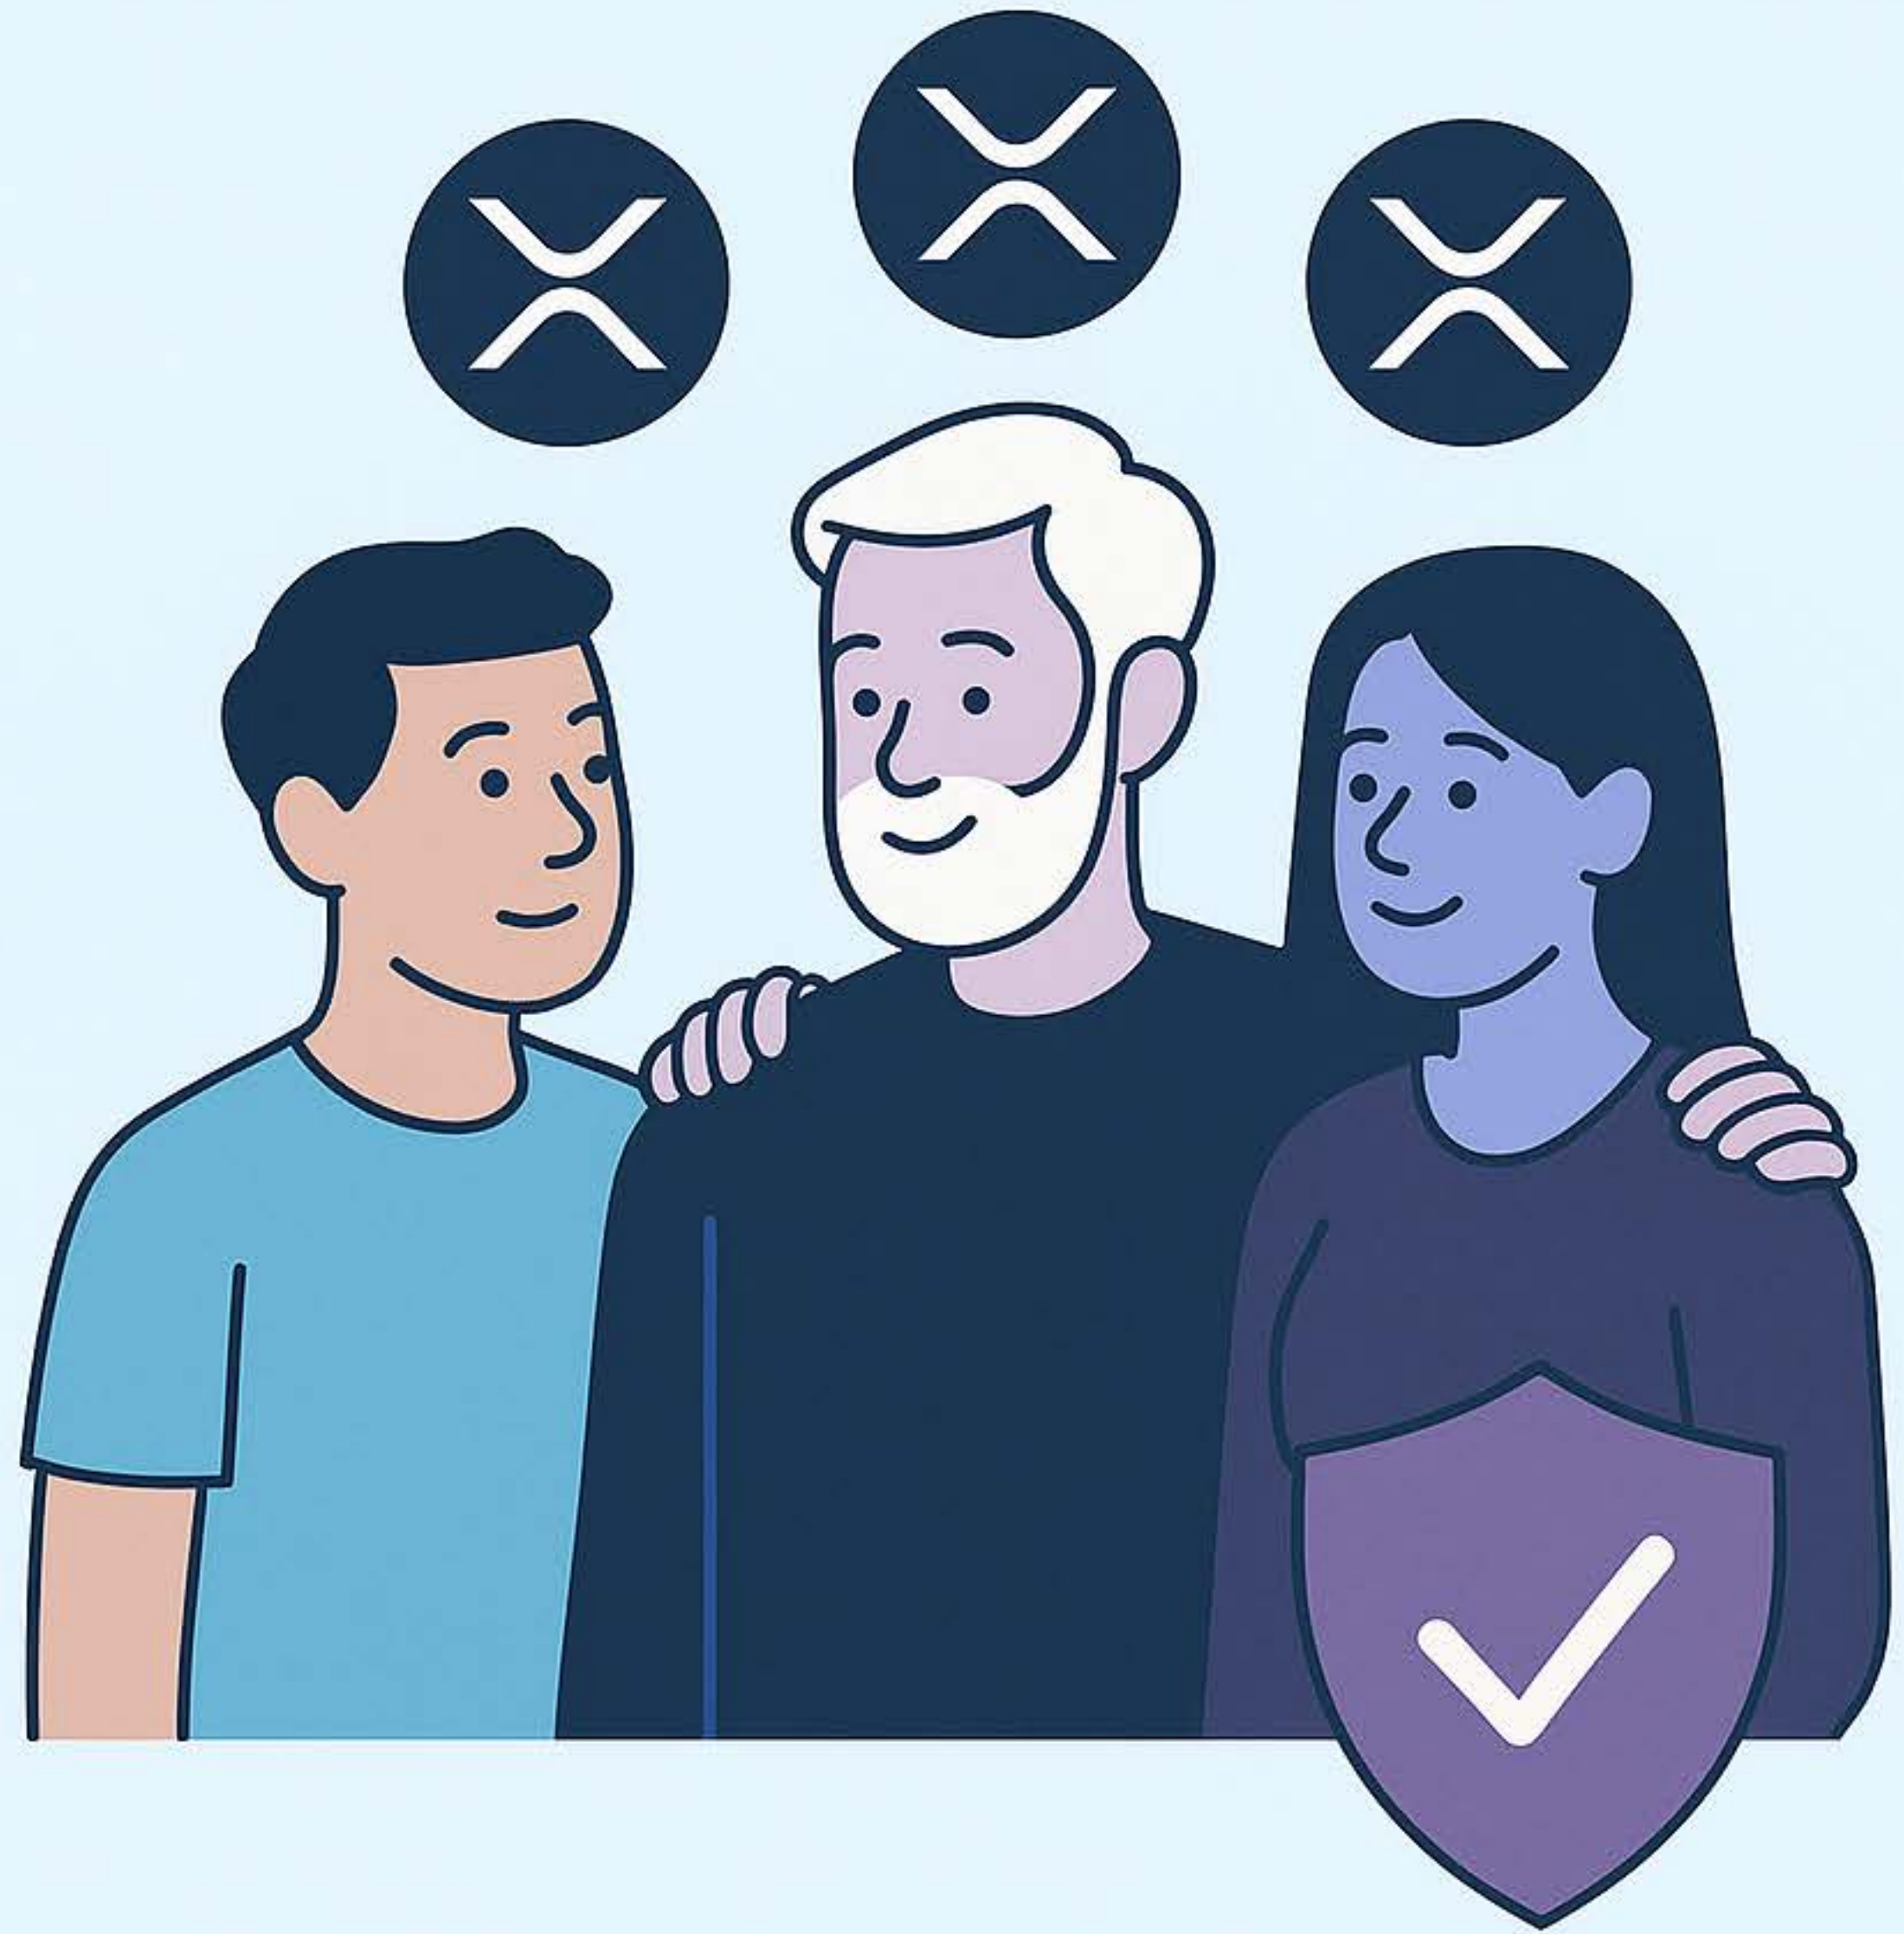

Use Cases

- Long-term holders
- Families planning inheritance
- DeFi platforms & wallet providers

Vision

- Crypto was built on trustless tech –
- But people still trust people.
- We bridge custody with human confidence

Roadmap

- **Phase 1:**
Hooks-based
prototype
- **Phase 2:**
Inheritance NFT +
triggers
- **Phase 3:**
Institutional
onboarding
