XRP Trust Vault+

The human solution for
digital asset custody
and inheritance

XRP Trust Vault+

A more secure, human approach
to self-custody on XRPL

XRP Trust Vault+

A secure and human-centric solution for self-custody of digital assets built on XRPL.

Key Features:

Social Multisig Recovery

Users define 3–5 trusted people who can jointly approve recovery.

Automated Digital Inheritance

Assets can be securely transferred to heirs without legal bureaucracy.

**Financial
Integration
Ready**

Why It Matters:

- Combines full self-control with emotional and procedural safety.
- Eliminates fear of loss while preserving decentralization.
- Bridges Web3 with the real financial world using XRPL.

Use Cases:

- Long-term holders
- Families and estate planners
- Institutions managing DeFi-backed assets

“Self-custody shouldn’t mean self-stress. Freedom, with backup.”
